MANITOBA POPULATION ESTIMATES - JUNE 1, 1987

Statistics Canada has today released the June 1, 1987 annual population estimates for Canada and the provinces. This report incorporates revisions based on final 1986 Census population counts, affecting previously published estimates from 1982 through 1986. For Manitoba the summary is as follows:

POPULATION	JUNE 1987	JUNE 1986	CHANGE
	1,079,000	1,071,200	UP 7,800 persons

NET INTER-PROVINCIAL MIGRATION	JUNE 1/86 - MAY 31/87	JUNE 1/85 - MAY 31/86
	-3,097	-2,297

Manitoba's June 1, 1987 population reached an estimated 1,709,000 persons, up 7,800 persons over the revised 1986 level of 1,071,200 - the fourth highest growth rate among the provinces.

Net loss due to interprovincial migration totalled 3,097 persons during 1986/87, compared with a loss of 2,297 persons in 1985/86. The gradual increase of migration outflows has led to more modest rates of population growth for Manitoba in recent years; nevertheless, the current net migration loss of 3,097 remains low compared with those of past years.

Nearly all provinces had significant migration outflows during 1986/87, with only Ontario (45,278) and British Columbia (7,609) gaining population from other parts of Canada. Manitoba's net losses were almost entirely to Ontario and B.C.

As already noted, this report incorporates extensive revisions to previously published data, and is intended to replace earlier issues.
